Current Role: Senior Machine Learning Engineer

SUMMARY

Senior Machine Learning Engineer with 5.5 years of experience designing predictive models, statistical learning systems, and production inference APIs. Deep expertise in Python, SQL, Machine Learning, Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch, and FastAPI.

WORK EXPERIENCE

Senior Machine Learning Engineer | QuantEdge Analytics | Mar 2022 - Present

- Built predictive models using Scikit-Learn and TensorFlow to forecast demand and optimize dynamic pricing across 40+ enterprise clients.
- Designed end-to-end feature engineering workflows using Python, SQL, Pandas, NumPy, and PostgreSQL handling 50M+ daily records.
- Exposed low-latency model inference endpoints using FastAPI and REST APIs on AWS cloud infrastructure with MLOps tracking.
- Conducted rigorous A/B testing and statistical hypothesis evaluation to validate model uplift (+18% conversion).

Machine Learning Engineer | NexGen Data Solutions | Jul 2020 - Feb 2022

- Developed NLP text classification and entity extraction pipelines using Python, spaCy, and Hugging Face transformers.
- Built automated SQL and Pandas analytics pipelines and interactive model performance dashboards.

EDUCATION

M.Tech in Computer Science and Data Science | IIT Bombay | 2020 | CGPA: 9.2/10

B.Tech in Computer Science | Delhi Technological University | 2018 | CGPA: 8.8/10

SKILLS

Python, SQL, PostgreSQL, Machine Learning, Deep Learning, Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch, FastAPI, REST APIs, NLP, spaCy, Hugging Face, LLMs & GenAI, AWS, MLOps, A/B Testing, XGBoost

CERTIFICATIONS

- AWS Certified Machine Learning - Specialty
- Google Cloud Certified Professional Machine Learning Engineer
- DeepLearning.AI TensorFlow Developer Certificate

PROJECTS

- Predictive Customer Lifetime Value Engine: Built gradient boosted and deep neural network models in Scikit-Learn and TensorFlow with Pandas preprocessing and FastAPI serving.
- Automated Clinical NLP Extractor: Implemented named entity recognition with spaCy, Hugging Face, and PyTorch.
